

OBJECTIVE IT Consulting role in three major areas; Training, Networking and Business Operations. Over 30 years experience in the technical / non-technical training fields for both small and large companies. Additionally, we have over 20 years experience in the data communications industry.

EXPERIENCE Managing projects for Fortune 500 companies and other companies worldwide. Projects consisted of:

- *Design, development and delivery of various training courses.*
- *Designed data communications networks.*
- *Evaluation of current training programs being implemented by business with emphasis on course materials, course content, delivery and instructor's techniques.*
- *Analyzed business operations to find ways in which to improve day-to-day operations resulting in an increase of performance, productivity and decrease in expenses.*
- *Extensive involvement in managing and working with clients at all levels of business operations.*
- *Continuous technical support and consulting outside of work engagements.*

Recent Engagements Include:

Global Knowledge, Cary, NC (1996 – present)

Conduct training classes in the data communications field for their clients worldwide.

Medical Services, US (1996 – present)

Providing medical offices with network consulting and business operations in general.

Small and Large Businesses, USA and International (1998 – present)

Helping business with training, networking and general business practices.

Past Engagements Included:
